### B. Sc. Blended Program in Environmental Science

The course aims to strengthen science education at the undergraduate level and will offer an internationally recognized degree. Students will be taught three basic sciences (Physics, Chemistry, Biology), and Mathematics in the first two years and will specialize in Environmental Science in their final year. The course curriculum would focus on Environmental issues along with topics such as Sustainability, Climate Change, Carbon Neutral aspects of the Environment. It will have clearly defined teaching and learning outcomes along with a transparent evaluation system. The quality assurance and evaluation procedures will be determined jointly by University of Melbourne and IISER Pune. The course will give students a comprehensive background in basic sciences, along with Environmental Science and will prepare them well for taking up higher studies at reputed institutes in India, Australia and other countries.
